Re: Gas pollution from furnaces
and water heaters.

I am a member of the League
of Women Voters of the Pasadena area.
I support strengthening Rules 1111
and 1121 to reduce emissions of
methane and oxides of nitrogen
from old furnaces and water
heaters by replacing these old
appliances with "cleaner" safer
ones.

The public must be made
aware of the need for change,
and be given incentives to
replace their old appliances.

Sincerely,
Rae Caselund
